

MONDAY EVENING, AUG. 20, 1906.

THE ARTICLE in last week's Insurance Review of New York, which was copied in Saturday's Gazette, was read throughout the community with no little regret. But few people save Chief Engineer tion was in existence asking for contributions toward purchasing a horse for that official. Had some citizens known that such a movement was on foot they would have taken steps to stop it, even if they had been compelled to subscribe themselves for the purchase of a horse, had such an animal been deemed indispensable to the Chief Engineer of the Fire Department. It can be stated in this connection that the present official is the only person who has filled the position who has deemed horse and buggy and a gongessential paraphernalia on the fire ground. The city has unjustly attained unenviable notoriety by a thoughtless act on the part of a city official who has obtained nearly everything he has asked of the City Council during the past nine or ten years he has been at the head of the fire department. Previous to his incumbency the salary of the chief was fifty dollars per annum. The present official has had his pay increased from time to time until he now draws two hundred and fifty dollars a year from the city. The increases have been made in order that his horse might be fed and his buggy kept in order. It is to be regretted that he went outside his own city to solicit anything. Alexandria has always been liberally disposed toward her fire department. Capacious and modern engine houses have been built, new apparatus purchased and every endeavor made to minimize losses by fire; hence but few serious conflagrations occur in this city. Beside all this, the City Council invariably contributes toward firemen's parades, excursion trips to other cities, &c. As an evidence of this, it will be remembered, Council a few weeks ago appropriated three hundred dollars toward defraying the expenses of the visit to Richmond of the members of the Alexandria fire department. The present Chief Engineer is an earnest, active and well-nearing official, but his act has been thoughtless and unnecessary when all the facts in connection with the case are considered.

CENTURIES AGO Mahomet made a trip to another world and gave an interesting description of the scenes beyond this planet. Later Baron Munchausen visited the dog star. He stated that the inhabitants of that orb do not put food in their mouth, as in this world, but deposit it large lumps through an opening in the stomach, thus avoiding mastication. The latest explorer of the planetary system is Sackville G. Leyson, of Syracuse, N. Y. While in a trance in the presence of 50 members of the First Progressive Co-operative Psychological paper dispatches would indicate although Association of Syracuse, of which he is president and founder, his spirit traveled erty has been destroyed by the fires which succeeded the earthquake. 141,000,000 miles and back in 40 minutes, he says, and visited Mars. deut's son-in-law, says no possible He is now preparing to take a spiritual trip to the moon. Some of his observations while on the raddy planet will be read with interest. He save that while looking down from a mountain top in the valley, he saw a number of persons. These he approached and found that they were so large that he only came up to their knees. They were no clothing, being all covered over with hair. They had great big ears and nioses like a lion, and only one eye, which was located in the middle of the forehead. When talking to a dispatch sent from Buenos Aires. each other their voices sounded like much like the men on earth. A peculiar thing he noticed was that their lung of Chili expressing the sympathy of this thing he noticed was that their lung government and the American people expansion was crosswise instead of with the people of Chili on account of dengthwise, like ours. Their chest did mot move up and down when breathing, but their sides moved in and out like a bellows. Besides the big men there was a lot of little ones, among the Martians, who lived in ca es in the ground. These had webbed feet and slipped over the ground in a motion which looked as if they were skating. They could walk up perpendicular walls like could walk up perpendicular walls like flies. Unlike the big men, they had two eyes, one in each temple. The front of the face was flat, as they had no nose, but they had a hole in each cheek which performed the same function. Their mouths seemed to be up and down and Conn. were on the front of their face. A DISPATCH from Norfolk shows that

It is probably well that a large percentage of the human race is not possessed of such a fine-strung nature, as were such civilized world. Many are compelled, through no fault of their own, to contract debts, but in most of such cases people place themselves under obligations they can avoid.

DISPATCHES from different points in Chili show that the earthquake of Thursday last was widespread and that Wholesale loss of life and destruction of property resulted. Thousands of persons who escaped death, but whose homes were shaken to the ground, are now camping out in the open air, hungry and cold-This is the third serious convulsion of Pettey were aware of the fact that a petias many years. A temporary lockup had to be provided because the town jail was filled with prisoners.

## THE EARTHQUAKE IN CHILL.

Dispatches received during the past two days show that Valparaiso, Chili, and, in fact, the whole of Chili, has me with one of the greatest earthquake dis-

asters in its history.

At 7:52 o'clock last Thursday evening Valparaiso experienced an earthquake-of great severity, and during that night 82 shocks were reli. Most of the buildings of the city either were ruined or damaged. The loss will be enormous, probably reaching \$250,000,000, Two thousand persons killed is considered to

be a fair estimate of the casualties.

Vina Del Mar, three miles from Valparaiso, and having a population of over 10.000; Quiribue, 225 miles to the south ward, with a population of 2,500; Salio Si Limache, 15 miles to the northwest, with a population of 6,500: Quillota, 25 miles to the northwest, with a population of 10,000, and villages all around were destroyed. Most of the damage was due to fire which started immediately after the first shock. The whole population is sleeping in the bills, the parks or the Food is very scarce. Milk costs two Chillian dollars a liter, and it is almost i opossible to obtain meat, even at high prices. The railroads are all destroyed. ### Sheriff Fled from Mob.

Gainesville, Ga., August 20 -Sheriff White county, Andrew Jackson, of reached the city at an early hour yester-day morning with Dave Moore, colored saulted the daughter of James Hood a well-known White county farmer, last Friday afternoon. Moore was arrested Saturday in White county. Threats of lynching became very frequent, although Judge Kimsey appealed to the people to allow the law to take its course, and went so far as to order a special term of the Superior Court to convene at Cleveland Monday morning to try the negro This in a measure appeased the people for a time, but on Saturday night threat lynching became so frequent that Judge Kimsey deemed it wise to have the prisoner removed to Gainesville for safekeeping. Accordingly he telephoned to Sheriff Crow, at Gainesville, late Saturday night, of the situation and instructed him ty meet the sheriff of White county on the way between Gaingsville and Cleveland and place the prisoner is jail here at all hazards. This was done enraged White county citizens as they hostly pursued him and ared at least one hundred shots at him. He outran them, however, and got out of their way.

No less praiseworthy has been the attitude of this Congress in continuing to maintain on a high plane of efficiency the United States navy. This country is irrevocably committed to the main-tenance of the Monroe dectrine, and policing the canal route, but both would be absurd on their face if the nation failed to its duty in main aining a thoroughly efficient navy. No other the betterment of our internal affairs, so much and such excellent work do its credit. The tremendous social and in dustrial changes in our nation have ren-dered evident the era of larger exercise by the national government of its power to deal with the business use of wealth, especially of corporate wealth, in interstate business. not too much to say that the course of Congress within the last few years, and the hearty agreement between the executive and legislative department of the nation in taking he needed action each within its own sphere, have resulted in the nation for the first time definitely entering upon the career of performance of duty in these matters. The task is peculiarly difficult, because it is one in which the fanatidal or foolish extremists and the reactionary, whether houest or dishonest play into one another's hands and thereby render it hard to secure action which shall be effective, and yet though not with equality as we are striving to zecure. It is a very easy thing to play the demagogue

is also easy to play the part of a mere obstructionist, to decline to recognize the great evils of the present system, and thereby strengthening the hands of those who advocate extreme and foolish measures. It is not easy to do as the present Congress and its immediate predecessors have done; that is, sternly to disregard alike the self interest of those who have profited by the present evils, Sheriff Jackson told the officers that he and the wild classes of those who care had a narrow escape from the mob of less to do away with them than to make a reputation with the nothinking of oding in exterme opposition to them. He ther calls attention to the employers' liability law, and says he shall ask Congress t put in the permanent foun of law, the provision he has made by executive order for securing to the wage workers under the government half helidays during the summer months, just as regular holidays are now secured by law for the salaried clerical workers in the classified service.

The President further on says:

We are anxious to help, alike by law and by executive action, so far as an our power lies, every housest man every right dealing corporation.
